

JORDAN ROSAS

Full Stack Software Developer

PROFILE

A meticulous, fast learning, Junior full stack developer with a passion for learning. Currently attending Nashville Software Schools .NET C# program, learning the fundamentals of software development. Searching for a work environment where I can be mentored, and grow as a software developer.

PROJECTS

WELCOME TO NASHVILLE

Nashville Software School- Second sprint: Our team built an itinerary builder application. We worked with 4 external API's utilizing http GET requests as well as practicing code modulating.

Nutshell

Nomads was the name of my groups application for our Nutshell-Group-Project at NSS. My group was tasked with creating an application where users can sign in / create an account. The user has the ability to send messages to friends, Create a task list, Create events that are shared with their friends, and a news article section where, again, the user can save articles of their choice or see what their friends have been reading.
