

# JORDAN ROSAS

## Jr. Full Stack Software Developer

jordanrosasdev@gmail.com | 360-951-8234 | jordanrosas.github.io

### Personal Profile

A meticulous, fast learning, junior full stack developer with a passion for learning. Currently attending Nashville Software School's .NET C# program, learning the fundamentals of software development. Searching for a work environment where I can be mentored, and grow as a professional software developer.

### Projects

#### Polyglot Pal

- Provides a way for users to connect with people in the community and learn a new language.
- Presented this React.js single page application in two weeks
- Designed in Adobe XD
- Built with React, Material UI, Bootstrap, Npm zipcode, JSON-server, CSS.
- Worked with many to many data relationships
- Implemented search feature to find users who speak a certain language in the JSON database.

#### Welcome To Nashville

- Itinerary Building application
- Built with Vanilla Javascript, HTML, CSS, Grunt, and Four external APIs
- Responsible for all data retrieval through javascript fetch calls
- Simple UI for users to create an itinerary for a trip to Nashville
- Utilized git and github for version control

#### J's Precision Remodeling

- First free lance Project for a remodeling company
- Built using HTML, CSS, Vanilla Javascript
- Learned time management
- Learned to how to effectively communicate with clients
- Learned how to utilize search engines to bring the clients vision to life
